Ports & Terminals - Mooring

GW-IMP™ Anode

(Product Code STDR - 1900)

GM-IMP™ sacrificial anodes are cathodic protection specifically designed per DNV RP B401:2010 to shield submerged chain from corrosion and can significantly improve mooring life expectancy. Manufactured from high purity zinc & aluminium alloys and attached at regular intervals along the mooring line, each system is designed to suit specific operational requirements including - chain size & model, water depth, total length of mooring line requiring protection, mooring location and period of protection required.

Available in standard configurations to suit Stud Link or Studless Mooring Chain. For further information please contact us.
